

The project InFiT “**Inspection and detection of Fissures in railway Tunnels**” (file number **IPT-2012-0980-370000**) intends to develop, under the leadership of DRAGADOS (ACS Group), an automated system for inspection and detection of fissures in the tunnel surface. For this development DRAGADOS counts on the collaboration of CARTIF Research Center. The project is funded by the Spanish Ministerio de Economía y Competitividad (**MINECO**) within the National Scientific Research, Development and Innovation Plan 2008-2011 (**INNPACTO 2012**).
